

How to care for house plants in Spring & Summer

Things to remember when caring for your house plants in the Spring & Summer.

1. Spring & Summer is the growing season with longer days. Trim and prune heavily in March and April and lightly prune in June & July.
2. Check soil more often use the drench and dry method.
3. Inspect your roots to see if your plants need a slightly larger pot. Spring is the time re-pot.
4. Use any water soluble fertilizer every 3rd or 4th watering.
5. Indoor plants should be kept out of direct sun if brought outside.
